

From String

Load Html From String

HtmlDocument.LoadHtml method loads the HTML document from the specified string.

Example

```
var html = @"<!DOCTYPE html>
<html>
<body>
    <h1>This is <b>bold</b> heading</h1>
    <p>This is <u>underlined</u> paragraph</p>
    <h2>This is <i>italic</i> heading</h2>
</body>
</html> ";

var htmlDoc = new HtmlDocument();
htmlDoc.LoadHtml(html);

var htmlBody = htmlDoc.DocumentNode.SelectSingleNode("//body");

Console.WriteLine(htmlBody.OuterHtml);
```
